

## The Leading Edge: The Sky's the Limit! Cutting-Edge Unmanned Aircraft

Broadcast on October 7, 2015

28:00

While many kids dream of becoming pilots, small high-performance unmanned aircraft are rapidly being developed. They're being used in places that people can't go near, such as disaster sites. There are unmanned helicopters that can go into tight indoor spaces, and flying crime-prevention robots with monitoring functions. Join us as we take a look at cutting-edge unmanned aircraft.
